

Hemodynamic Adaptation (HA) Workgroup and Retinopathy of Prematurity (ROP) Workgroup Face-to-Face Meetings at Health Canada

Date: September 26, 2017

Where: Ottawa, Ontario (Can also participate via WebEx)

The Hemodynamic Adaptation (HA) Workgroup and the Retinopathy of Prematurity (ROP) Workgroup face-to-face meetings will take place on September 26th, 2017. Thanks to INC's representative Agnes Klein and her Health Canada colleagues, this workshop will take place at the Health Canada headquarters in Ottawa, Ontario. The HA Workgroup will discuss the results of the literature review to define normal values for blood pressure and appropriate methods of measurement in preterm and term neonates. The objective of the ROP Workgroup is to finalize the white paper that covers proposed ROP descriptors, a ROP activity scale, structural and functional efficacy endpoints, and long-term safety outcomes for clinical trials of ROP.

An INC networking dinner will precede the workshop. INC members are welcome, and we simply ask that you register for the dinner and either the HA or ROP workshop. There are no registration fees, and if you are unable to attend in person, you can still participate in the September 26th sessions by webex. To find our further information and to register for this meeting, please go to the website ([INC Workgroup Meetings at Health Canada](#)).

Please contact Alicia West at awest@c-path.org for additional logistical information.
